SCOPE OF THE JOURNAL

Informatics is rapidly developing field. The study of informatics involves human-computer interaction and how an interface can be built to maximize user-efficiency. Due to the growth in IT, individuals and organizations increasingly process information digitally. This has led to the study of informatics to solve privacy, security, Healthcare, education, poverty, and challenges in our environment. The Informatics Engineering, an International Journal (IEIJ) is an open access peer-reviewed journal that publishes articles which contribute new results in all areas of Informatics. The goal of this journal is to bring together researchers and practitioners from academia and industry to focus on the human use of computing fields such as communication, mathematics, multimedia, and human-computer interaction design and establishing new collaborations in these areas.

Topics of interest include, but are not limited to, the following

- Computational Complexity
- Informatics in Complexity Sciences
- Complex Computer System
- Business Intelligence and Data Warehousing
- Knowledge & Information Engineering
- Multimedia Systems & Human-Machine Interaction
- Natural Language Processing
- Artificial Intelligence & Robotics
- Database and Data Mining
- Software Engineering
- Health Informatics
- Pervasive Computing and Ad Hoc Networking
- Wireless Networks & Communications
- Ubiquitous Systems
- Theoretical Foundations
- Gaming Technologies
- Statistical computation
- Structural Informatics
- Computation Finance
- Operations and Supply Chain Management
- Security and Assurance
- Bio-Medical Informatics
- Semantic Web and Web Services
- Neuro-Computing and Applications

Paper Submission & Manuscript preparation Guide

Paper Submission

Authors are invited to submit papers for this journal through E-mail iejjournal@yahoo.com or iejjournal@airccse.org. Submissions must be original and should not have been published previously or be under consideration for publication while being evaluated for this Journal.

Review Process

Submissions are accepted for review with the understanding that the same work has been neither submitted to, nor published in, another publication. Simultaneous submission to other publications will result in immediate rejection of the paper. Papers are not within the journal scope will be rejected immediately after the pre review process.

All manuscripts will be subject to a well-established, fair, unbiased peer review and refereeing procedure, and are considered on the basis of their significance, novelty and usefulness to the Journals readership. The reviewing structure will always ensure the anonymity of the referees & it will be reviewed by 3 experts in the field. The review output will be one of the following decisions:

1. Accept
2. Accept with minor changes
3. Weak Accept with major changes
4. Reject

The review process may take approximately two ~three months to be completed. The Editor reserves the right to reject a paper if it does not meet the aims and scope of the journal, it is not revised well.

Copy Right Form

After submitting final manuscript, you can get copy right form from AIRCC secretary
