SCOPE OF THE JOURNAL

Cloud computing helps enterprises transform business and technology. Companies have begun to look for solutions that would help reduce their infrastructures costs and improve profitability. Cloud computing is becoming a foundation for benefits well beyond IT cost savings. Yet, many business leaders are concerned about cloud security, privacy, availability, and data protection. To discuss and address these issues, we invite researchers who focus on cloud computing to shed more light on this emerging field.

Topics of interest include but are not limited to, the following

Cloud Application, Infrastructure and platforms
Design Tool for Cloud Computing
Cloud Business
Service-Oriented Architecture in Cloud Computing
Cloud based, Parallel Processing
Virtualization on Platforms in the Cloud
Location Based Services, Presence, Availability, and Locality
Mobile Clouds for new millennium, mobile devices
Social Clouds (Social Networks in the Cloud)
Maintenance and Management of Cloud Computing
Cloud Computing Architecture
Cloud Applications in Vertical Industries
Cloud storage and file systems
Networks within cloud systems, the storage area, and to the outside
Virtualization in the context of cloud computing platforms
System integration, virtual compute clusters
Consolidation
NoSQL data stores
Performance, SLA management and enforcement
Resource provisioning
Security techniques for the Cloud
Energy management and programming environments
Data storage and management in Cloud computing
Case Studies and Theories in Cloud Computing
The Open Cloud: Cloud Computing and open source
